

AWAKEN[®] ST

SEED TREATMENT

AWAKEN[®] ST

Awaken ST (7-0-1 + micronutrients) is a seed treatment with ACA technology, which features the Zinc Ammonium Acetate (ZAA) compound with a micronutrient package. Awaken ST typically leads to quicker emergence and greater plant biomass by promoting root growth. Awaken ST coats the seed with nutrients, this has been shown to improve early vigour and in some cases higher yields.

Features

- Zinc Ammonium Acetate
- Clear green solution
- Compatible with most common seed treatments*

Benefits

- Has been shown to improve early vigour post emergence
- Has been shown to increase yield potential compared to untreated seed
- Improved root biomass observed in treated seed
- Easy clean up and better handling compared to other zinc seed treatments

Other

Specific Gravity: 1.187

pH: 6.0 – 6.5

Colour: Clear dark green liquid

Compatibility: Highly compatible*

Storage: Store out of direct sunlight in a cool environment

Contains: 7-0-1 Zn 6% W/V plus B, Cu, Fe, Mn, Mo

**Refer to label for compatibilities with other seed treatments*

The Role of Nutritional Seed Dressings

Nutritional seed dressings are a quick and effective way to apply micronutrients directly to seed, providing early nutrition that helps support root and plant growth prior to the plant growing a developed root system to access nutrients from the soil profile.

Tech Notes

National Replicated Trials

In replicated canola trials conducted by Nutrien Ag Solutions over four years, crops grown from Awaken ST treated seed were compared to crops grown from seed with no Awaken ST. A positive yield increase was observed in most treated versus untreated crops as the graph below demonstrates.

Root Biomass With and Without Awaken ST Seed Treatment Cootamundra, NSW (2016)

Untreated

Treated with Awaken ST
