

Awaken & Maximum N-Pact in Canola

AWAKEN[®]

Maximum N-Pact[™]

What is it and how does it work?

Awaken applied to your crop helps increase root development and plant growth.

Maximum N-Pact is the fuel your plants need to stay healthy and maximise yield potential.

Awaken is an early season nutritional foliar spray ideal for improving crop vigour and yield performance. It contains zinc ammonium acetate plus an extensive chelated micro nutritional package for increased photo-pigment concentrations, and photosynthetic activity.

Maximum N-Pact is a mid to late season resin based on foliar nutritional nitrogen spray ideal for enhancing crop quality and yield, correcting nitrogen deficiencies and contains an Amino Acid Package to help plants withstand stressful conditions.

The result means greater plant metabolic activity and increased nutrient uptake and plant translocation.

The resin based formula means less burn and better leaf absorption.

Which crops are suitable?

Canola

Canola

When should I use it?

Vegetative stage

Reproductive stage

What are the benefits of incorporating these products into my existing program?

- Enhanced early plant growth and vigour
- Compatible with broad range of post emergent sprays
- Compatible with most post emergent fungicides and herbicides
- Improved recovery from stress and crop damage
- More fibrous and extensive root system
- Excellent addition to early in-season crop sprays

- Compatible with broad range of post emergent sprays
- 31% more efficient uptake vs other N sources (using enhanced triazone Nitrogen)
- Increased crop photosynthesis
- Faster response following crop stress
- Excellent crop safety
- Increases drought and salinity tolerance
